

WATERING TIMER INSTRUCTION MANUAL

CAUTION: PROTECT THE DEVICE AND ITS PARTS FROM FREEZING
Working temperature: 5~60°.

Remove the device from the faucet and store it indoors until the temperature is suitable for the device.

1. Charge input/interface: 5V / Micro usb
2. Keep Pressing **Set** button for 5 seconds to turn on or turn off the device.
3. LCD display:

4. How to set up the automatical program:

SET button is for setting individual settings of the control panel. After pressing **SET** button, relative function will flash and it is waiting to be set. Press **SET** button again to move to the next option and set the next value.

- + button is for adding number
- button is for deducting number

After setting *Starting Hour*, *Interval Time* and *Watering Time*, please wait 10 seconds. When you see , the program settings are ready.

Program example:

A. Water every morning at 8:00 and every evening at 20:00 for 5 minutes each watering.

Set the *Start Hour* at 8:00, set *Interval Time* to 12 (hours) and *Watering Time* to 5 (minutes). Wait 10 seconds, the timer will begin its first program and run for 5 minutes at 8:00. The timer will now water everyday at 8:00 and 20:00 for 5 minutes until you change it.

B. Water every morning at 8:00 for 10 minutes.

You set the *Start Hour* at 8:00, set *Interval Time* to 24 (hours) and *Watering Time* to 10 (minutes). Wait 10 seconds, the timer will begin its first program and run for 10 minutes when 8:00. The timer will now water everyday at 8:00 for 10 minutes until you change it.

5. How to water manually:

Press **Man** button to water manually. Press it to start watering, press again to stop watering.

6. How to set up children lock

To lock the panel, press + button and - buttons at same time. All buttons are locked. Press + and - buttons at same time again to unlock all buttons.

TIMER INSTALLATION:

- Hold the unit steady.
- Loosen the **LARGE LOCKING COLLAR RING** located in the top of the timer until the inner **BLACK FAUCET COLLAR** is loose.
- Screw the **BLACK FAUCET COLLAR** onto the faucet/tap until it is hand tight, and then hand tighten the **LARGE LOCKING COLLAR RING**.
- Turn on the faucet/tap to open the flow of water.

(DO NOT USE WRENCHES OR PLIERS TO TIGHTEN THE COLLARS.)

TROUBLESHOOTING GUIDE:

If the water does not come on, please check the following:

1. Be sure the faucet/tap is turned on.
2. Check to be sure the batteries are in good condition. If battery power is low, please charge it.
